Brajesh Kumar Singh

QEA Associate | 7001859341 | brajeshkrsinghofficial@gmail.com | linkedin.com/in/bkumarsingh

PROFESSIONAL SUMMARY

Results-driven Quality Engineering and Assurance (QEA) professional with 4.2 years of expertise specializing in end-to-end quality validation for web and mobile (iOS/Android) platforms within the Retail and E-commerce domains. Proven track record of reducing manual regression cycle times by 30% and maximizing UI automation coverage to 90% utilizing TypeScript with Playwright (BDD). Proficient in full-stack testing, including API debugging and verifying cloud data pipeline integrity across Azure and GCP environments. Strong cross-functional collaborator adept at lifecycle management using JIRA and Azure DevOps to safeguard software reliability and user experience.

CORE TECHNICAL COMPETENCIES

- **Automation Frameworks:** Playwright, Reqnroll, TestNG, TestCafe, Selenium, Appium, RestSharp, Cucumber
- **Programming Languages:** C#, TypeScript, JavaScript, Java, SQL
- **API & Debugging:** Postman, Charles Proxy, Android Studio (Logcat)
- **Cloud & Databases:** GCP (Pub/Sub, Cloud Spanner, BigQuery), Azure (SQL, Cosmos DB)
- **CI/CD & Source Control:** Jenkins, Azure DevOps (ADO), Argo CD, Git
- **Reporting & Tools:** ExtentReports, New Relic, ADF Studio, Argo Logs, GitHub Copilot
- **AI & GenAI Tools:** GitHub Copilot (GHCP), Claude, Gemini, Model Context Protocol (MCP)
- **Project Management Tools:** Jira, Confluence, Azure DevOps

PROFESSIONAL EXPERIENCE

COGNIZANT | Senior Test Analyst (Costco Application) *2025 – Present*

- Orchestrate the complete quality lifecycle within Azure DevOps (ADO), managing user stories, test cases, execution, and defect tracking.accelerating test scenario generation and script writing by strategically prompting **Claude** and **Gemini**.
- Cloud-Native BDD Framework Architecture: Architected and maintained a multi-tier E2E automation framework integrating Playwright (UI), RestSharp (API), and GCP messaging/database services (Pub/Sub, BigQuery, Cloud Spanner) to validate complex inventory and supply chain workflows
- Developed highly reliable E2E UI and API automation (95%) using TypeScript.
- Conducted exploratory and manual validation on GCP services (Pub/Sub, Spanner DB, BigQuery) to verify data pipeline integrity.Utilized Argo Logs for real-time monitoring and integrated test suites into CI/CD pipelines for continuous regression prevention.
- Leveraged **GitHub Copilot (GHCP)** within **VS Code** to refactor, debug, and optimize TypeScript codebases, ensuring clean and scalable E2E test architecture.

COGNIZANT | Senior Test Analyst (DPOM Application) *2024 – 2025*

- Executed E2E website testing strategies integrating UI automation, targeted API validation, and data integrity checkpoints.
- Spearheaded UI automation architecture using TestCafe, elevating coverage from 35% to 90% to accelerate regression cycles.
- Validated RESTful APIs hosted on Azure using Postman and performed data ingestion testing within Azure Cosmos DB.
- Leveraged ADF Studio to monitor pipeline runs, trigger executions, and verify ETL data transformations.

COGNIZANT | Test Analyst (Nike Mobile App) *2022 – 2024*

- Directed mobile testing across Android & iOS platforms for critical features (authentication, payments, push notifications).
- Intercepted and debugged live API traffic using Charles Proxy to secure seamless frontend-to-backend integration.
- Analyzed runtime crash logs via Android Studio Logcat and executed cloud-based mobile testing using BrowserStack.
- Authored automation scripts using Java with Selenium, and mobile frameworks using Appium, TestNG, and New Relic.

EDUCATION

KIIT UNIVERSITY — Bachelor of Technology (B.Tech) in Mechanical Engineering *2018 – 2022*

ACHIEVEMENTS & RECOGNITION

- **2nd Place Winner:** Cognizant Corporate Hackathon – Programmed and launched an innovative project leveraging Generative AI.
- **Client Commendation:** Formally recognized by Nike stakeholders for exceptional consistency in high-quality daily deliverables.
